Objective & Profile

Senior in BS Computer Science at North Carolina State University (NCSU). Looking for a full time position or a means into.

Education

Undergraduate Senior in Computer Science,
North Carolina State University (NCSU)

GPA:3.1

Skill Experience

- AWS Services EC2 / S3
- Apache Hadoop / Pig / Spark API
- Jenkins / Selenium / Gerkin
- REST API / RESTful development
- Angular / Hibernate / SpringBoot / MySQL
- Bootstrap / JQuery
- Crestron Toolbox / Wireshark

Work Experience

NCSU Senior Design, Full Time

January 2019-Present

- Working with LAS Technologies in information analysis management
- Create an application to dynamically allocate AWS EC2 cluster resources to provide a smooth user experience and prevent slow-downs for the client using the cluster while optimizing computation performance.
- Cluster runs Apache Pig scripts using the Hadoop API.

NCSU Senior Service Technician, Part-time

August 2016-Present

- Project leader for campus wide equipment integrations for new and existing rooms, delegating work with 20 other part time employees and getting things upgraded in a timely fashion while avoiding mishaps.
- Primarily I am responsible for responding to professors on campus with immediate assistance issues.
- I am trained to lead install projects for computer systems that are used in each classroom, this includes being responsible for multiple \$25,000 rooms.
- Work as a team to schedule appointments, respond to assistance calls, and still help manage 216 different and unique classroom setups.
- Create automated systems to perform niche tasks.

KrowdByz, ULI Developer, Internship

July 2013-January 2014

- My primary job was to work on the Front-end of a social media-based website, but I could implement additional functions to the MVC based website and add backend support for new features.
- Worked in a remote setting from home with a group of people including smaller teams that focus on specific projects.
- I excelled shortly after joining the team and became heading my own projects while working with and teaching newer hires.

Awards

- Over this past summer (2018), was acknowledged for the outstanding work I performed while managing 20+ part-timers, at NCSU, as we upgraded all the equipment we provided to classrooms on campus.
- I have been awarded on customer service and communication numerous times while at KrowdByz which was primarily remote team work.

Software Languages

- Java / C / C#
- C++
- JS / PHP / CSS / Python / R
